BIH BRANDY SANGO

Business Intelligence Analyst | Power BI · DAX · SQL · Python

Limbe, Cameroon · +237 651 899 848 · bihbrandy15@gmail.com · LinkedIn · GitHub · Portfolio

PROFESSIONAL SUMMARY

Business intelligence analyst who has worked in sales and in data, so I build reports that sales teams actually use. I turn raw sales, inventory and finance records into Power BI star-schema models and dashboards a business owner can read at a glance. I hold a B.Tech in Software Engineering Interning, spent more than four years automating reporting for a US fashion company, and completed the Women Techsters Fellowship (Tech4Dev) Data Science and Engineering track in October 2026. My eight BI projects are public on GitHub with the code and findings.

CORE SKILLS

- **Business Intelligence:** Power BI (DAX, Power Query, star-schema semantic models, time intelligence), Tableau, Looker Studio, advanced Excel (pivot tables, XLOOKUP, dashboards), data storytelling
- **Data and Databases:** SQL (PostgreSQL, MySQL, SQLite), MongoDB, ETL pipelines (Prefect), data cleaning, REST APIs and JSON, web scraping
- **Programming and Data Science:** Python (Pandas, NumPy, scikit-learn), statistics, regression and classification, Git and GitHub
- **Business:** KPI definition, stakeholder reporting, proposal writing, market research, CRM tools
- **Languages:** English (fluent), French (professional working proficiency)

PROFESSIONAL EXPERIENCE

Business Intelligence and Automation Consultant (Freelance) | 2026 to Present

- Built a Power BI semantic model and report on 18 months of Lightspeed point-of-sale data for Stanlion (Jan 2025 to Jul 2026), covering sales by product, brand, customer, size and staff, plus inventory on hand
- Delivered end-to-end Power BI, Tableau and Excel projects, each with a written brief and the code on GitHub

Administrative Assistant, Stanlion Clothing Company (Remote, Maryland, USA) | Dec 2021 to Present

- Wrote Python automation for routine reporting, cutting manual data entry time by 40%
- Wrote SQL queries and built advanced Excel templates and Power BI dashboards to track sales, inventory and invoicing in one place
- Cleaned business records, raising data accuracy by 25%, and redesigned processes that improved operational efficiency by 30%
- Supported the CEO and Creative Director with scheduling, vendor coordination and confidential records

Business Development Manager, D. Moukouri & Partners (Law Firm) | Feb 2026 to Sep 2026

- Used market research and data analysis to find new business opportunities and build a better-qualified client pipeline
- Tracked client and partner engagement and conversion with CRM and data-tracking tools
- Analysed market trends and competitor positioning, and wrote proposals tied to revenue targets

Software Engineering Intern, CRTV Cameroon Radio Television | Aug 2019 to Nov 2021

- Wrote Python applications that automated data collection and reporting, saving the team about 6 hours of manual reporting a week
- Designed SQL databases and queries that cut report preparation time by about 30%
- Delivered 2 internal projects on schedule as one of 5 engineers, using Git through the full development cycle

SELECTED PROJECTS (code and reports on GitHub)

- **Palmpay Sales Analysis (Power BI):** 12-page report on five years of US and German sales: $285M in revenue, Germany growing every year, US revenue down 26% in 2009; with deck and strategic brief
- **JustDrinks LTD, Fellowship Capstone (Power BI):** star-schema model with 54 DAX measures on sales, purchasing and inventory for an 80-store retailer, plus a web dashboard
- **Financial Sales Analysis (Power BI):** 700 transactions across five countries: $118.7M in sales but only 14 cents of each dollar kept as profit; Government earns 67% of profit
- **Revenue Rhythm (Power BI):** when the money comes in: four busy months bring 36% of sales and Q4 2014 is the best quarter for profit
- **Consumer Spending Power (Tableau):** dashboard on 500,000 survey records from 185 countries, with recommendations for a consumer credit company

- **Healthcare Cost Analysis (Excel):** 110,300 cleaned records, live one-screen dashboard with six slicers and pivot charts
- **West Africa Brewery Sales (PostgreSQL):** 20 business questions answered in SQL on 1,047 sales across five countries

EDUCATION AND FELLOWSHIP

Women Techsters Fellowship 2026, Data Science and Engineering Track, Tech4Dev | Completed Oct 2026
One year, with 24 weeks (about 384 hours) of training in Python, statistics, SQL and MongoDB, ETL with Prefect, APIs and web scraping, Power BI and Tableau, and machine learning, ending in a capstone project. Mentored by an AWS Public Sector Solutions Architect.

B.Tech, Software Engineering Interning, Second Class Honours (Upper Division), CGPA 3.27/4.0 | 2021
Havard Higher Institute of Science and Technology (HHIST), Bamenda; degree awarded by The University of Bamenda

Higher National Diploma, Software Engineering Interning | 2020, HHIST, Bamenda

CERTIFICATIONS

- Career Boost with Power BI and AI, Exodus Experts (Nov 2025)
- Data Analytics Essentials, Cisco Networking Academy (Dec 2025)
- Data Science and Analytics; Presenting Data, HP LIFE (Oct 2025)
- Introduction to Data Science, Simplilearn SkillUp (Oct 2025)
- Three IBM Granite courses on classifying and summarizing data, IBM SkillsBuild (Oct to Nov 2025)
- Innovating with Google Cloud AI, Simplilearn / Google Cloud (Sep 2025)
- Master in AI Engineering (Udemy course) (Sep 2025)

LEADERSHIP AND COMMUNITY

- Team lead, Women Techsters Fellowship 2026: led a team through Excel, SQL, Power BI and Tableau assignments and the healthcare capstone, coordinating tasks and presentations
- Speaker and trainer, Tech Girls Drive Advocacy (Tech4Dev, Mar 2026): trained girls on technology careers
